# THE PHYSICS OF THE PINEWOOD DERBY

---

## TABLE OF CONTENTS

<b>CHAPTER 1 - INTRODUCTION .....</b>	1
---------------------------------------	---

### **CHAPTER 2 - CONSTANTS, PARAMETERS, AND VARIABLES**

<b>2.1 ENVIRONMENTAL CONSTANTS .....</b>	7
<b>2.2 TRACK PARAMETERS .....</b>	8
2.2.1 The Standard Track .....	8
2.2.2 The Perfect Ramp .....	9
<b>2.3 CAR PARAMETERS .....</b>	10
2.3.1 The Standard Car .....	10
2.3.2 The Perfect Car .....	11
2.3.3 The Perfect Race .....	12
<b>2.4 VARIABLES .....</b>	12

### **CHAPTER 3 - SIMPLE MATHEMATICAL MODELS FOR THE PERFECT CAR**

<b>3.1 THE CIRCULAR ARC RAMP .....</b>	15
<b>3.2 THE INCLINED PLANE RAMP .....</b>	17
<b>3.3 THE CIRCULAR ARC RAMP - EXACT SOLUTION .....</b>	18
<b>3.4 THE PERFECT RAMP .....</b>	25
3.4.1 Various Circular Arc ramps .....	25
3.4.2 The Brachistichrone - A Variational Application in Space .....	28
3.4.3 The Cycloid Ramp - Horizontal Tangent Position Unspecified .....	30
3.4.4 The Cycloid Ramp - Horizontal Tangent Position Specified .....	31
3.4.4.1 Analysis of Cycloid Ramp Motion .....	33
3.4.4.2 Cycloid Properties .....	34
3.4.4.3 Time Calculation .....	36
3.4.5 The Lagrangian Formulation - A Variational Application in Time .....	37
<b>3.5 THE CENTER OF MASS EFFECT .....</b>	40
3.5.1 The Circular Arc Ramp .....	40
3.5.2 The Inclined Plane Ramp .....	43
3.5.4 Comparison of The Circular Arc and the Inclined Plane Ramp .....	44

### **CHAPTER 4 - MORE DETAILED AERODYNAMIC AND OTHER MATH. MODELS**

<b>4.1 INTRODUCTION .....</b>	45
<b>4.2 WHEEL MOMENT OF INERTIA .....</b>	45
4.2.1 The Circular Arc Ramp .....	46
4.2.2 The Inclined Plane Ramp .....	48
<b>4.3 AIR RESISTANCE .....</b>	49
4.3.1 Introduction .....	49
4.3.2 The Newtonian View .....	49
4.3.3 The Momentum Balance Approach .....	51
4.3.4 Energy Considerations .....	56
4.3.5 Immersed Flow .....	57
4.3.6 Theoretical Drag Coefficients .....	62

## TABLE OF CONTENTS (CONTINUED)

4.3.7	Viscosity Effects .....	63
4.3.8	The Boundary Layer .....	64
4.3.9	Experimental Drag Coefficients .....	66
4.3.10	The Circular Arc Ramp .....	68
4.3.11	Horizontal Motion .....	72
4.3.12	The Inclined Plane Ramp .....	73
<b>4.4</b>	<b>FRICTION</b> .....	75
4.4.1	Basics of Friction .....	76
4.4.2	The Circular Arc Ramp .....	78
4.4.3	The Inclined Plane Ramp .....	81
<b>4.5</b>	<b>SUMMARY OF RELATIVE EFFECTS</b> .....	82
<b>4.6</b>	<b>REACTION FORCE EFFECT ON FRICTION</b> .....	84
<b>4.7</b>	<b>A MORE EXACT VELOCITY SOLUTION</b> .....	87

## CHAPTER 5 - A COMPLETE MATHEMATICAL MODEL

<b>5.1</b>	<b>THE CIRCULAR ARC RAMP</b> .....	91
<b>5.2</b>	<b>THE VELOCITY SOLUTION</b> .....	96
<b>5.3</b>	<b>HORIZONTAL MOTION</b> .....	97
<b>5.4</b>	<b>THE INCLINED PLANE RAMP</b> .....	102
5.4.1	Ramp Motion Ignoring the Transition Region .....	102
5.4.2	The Inclined Plane Ramp Transition .....	103
5.4.2.1	Newton's Second Law Approach to the Transition Time .....	104
5.4.2.2	The CM Path and Energy Relation Approach .....	105
5.4.2.3	The Exact Transition Time .....	113
<b>5.5</b>	<b>SUMMARY</b> .....	116
5.5.1	The Circular Arc Ramp .....	116
5.5.2	The Inclined Plane Ramp .....	116
5.5.3	Horizontal Motion .....	116
5.5.4	The Center of Mass Effect .....	116

## CHAPTER 6 - THE EXACT SOLUTION FOR THE CIRCULAR ARC RAMP

<b>6.1</b>	<b>INTRODUCTION</b> .....	117
<b>6.2</b>	<b>THE MILNE METHOD - PERFECT CAR CASE</b> .....	118
6.2.1	The Maclaurin Series .....	119
6.2.2	The Milne Solution .....	121
6.2.3	Interpolation for Time and Velocity .....	122
6.2.4	The Solution for Small $h$ Values .....	126
<b>6.3</b>	<b>THE MILNE METHOD - GENERAL CASE</b> .....	127
6.3.1	Summary .....	127
6.3.2	The Maclaurin Series .....	129
6.3.3	The Milne Solution .....	131
<b>6.4</b>	<b>CORRELATION DEVELOPMENT</b> .....	131
<b>6.5</b>	<b>EXTENSIONS TO THE CIRCULAR ARC RAMP MODEL</b> .....	138
6.5.1	Smaller Values for Starting Angle .....	138
6.5.2	Circular Arc Ramps Not Tangent to the Horizontal .....	140

## TABLE OF CONTENTS (CONTINUED)

### CHAPTER 7 - WHEELS

<b>7.1</b>	<b>INTRODUCTION</b>	142
<b>7.2</b>	<b>WHEEL MATERIAL PROPERTIES</b>	142
<b>7.3</b>	<b>SLAB WHEELS</b>	144
<b>7.4</b>	<b>STANDARD WHEELS</b>	145
7.4.1	Standard Wheel - 1990	145
7.4.2	Standard Wheel - 1991	149
7.4.3	1991 Wheel and Axle Dimensions	150
<b>7.5</b>	<b>LATHE TOOLS AND FITTINGS</b>	152
7.5.1	Lathe Tools	152
7.5.2	Standard and Segmented Wheel Fittings	153
<b>7.6</b>	<b>MODIFYING THE 1990 STANDARD WHEEL</b>	155
7.6.1	The White 12/3/90 Wheel	155
7.6.2	The White 12/29/90 Wheel	159
7.6.3	The White 1/20/91 Wheel	159
7.6.4	The Black Widow Pace Car Wheel	162
<b>7.7</b>	<b>MODIFYING THE 1991 STANDARD WHEEL</b>	165
7.7.1	The JN No. 99 Wheel	165
7.7.2	The Garcia 2/93 Wheel	166
7.7.3	The JS Red 2/92 Wheel	166
7.7.4	The JS Min Spec Wheel	166
7.7.5	The JN Test Wheel	167
7.7.6	The JN Silver Rear Wheels	169
7.7.7	The JN Silver Front Wheels	169
<b>7.8</b>	<b>SMALL AXLE SEGMENTED AND UNSEGMENTED WHEELS</b>	170
7.8.1	Making Small Axles - 0.042"	170
7.8.2	Making Small Axles - 0.039"	172
7.8.3	Quench Hardening the Axle Shaft	173
7.8.4	Polishing the Axle Assembly	174
7.8.5	The JS Red 039 Wheel	175
7.8.6	The JN Gold 042 Wheel	181
7.8.7	The JN Silver 042 Wheel	181
7.8.8	The JN Red 042 Wheel	181
<b>7.9</b>	<b>X - WHEELS</b>	182
7.9.1	X - Wheel Outer Shell	182
7.9.2	X - Wheel Inner Shell	185
7.9.3	X - Wheel Assembly	188
<b>7.10</b>	<b>REMOLDED WHEELS</b>	189
7.10.1	Mold Construction	189
7.10.2	Using the Mold	190
7.10.3	Tapering the Wheel	192
7.10.4	The T2 Hole Wheel	193
7.10.5	The T2 Calibrate Wheel	194
7.10.6	The Optimum Wheel	195

## TABLE OF CONTENTS (CONTINUED)

<b>7.11</b>	<b>WHEEL FORCES AND PERFORMANCE</b>	196
7.11.1	Wheel Friction	196
7.11.2	Wheel Types	197
7.11.3	Approximate Analysis - One Wheel Sliding on Axle	197
7.11.4	Detailed Analysis	200
7.11.5	Summary of Wheel Forces	207
<b>7.12</b>	<b>WHEEL PROPERTY SUMMARY</b>	210

## CHAPTER 8 - CAR BODIES

<b>8.1</b>	<b>INTRODUCTION</b>	211
<b>8.2</b>	<b>CAR BODY DESIGN</b>	211
8.2.1	Pinewood Derby Body Blocks	211
8.2.2	The Standard Car Body	212
8.2.3	The White Car Body	214
8.2.4	The JSRG Car Body	215
8.2.5	The JNRG Car Body	216
8.2.6	The JNTS Car Body	217
8.2.7	The JSTR Car Body	220
8.2.8	The JNSN Car Body	221
8.2.9	The T2 Car Body	222
8.2.10	The JNGE Car Body	225
<b>8.3</b>	<b>THE ESTIMATION OF AERODYNAMIC DRAG COEFFICIENTS</b>	226
8.3.1	The Reynold's Number	226
8.3.2	Skin Friction Drag	228
8.3.3	Pressure Drag	229
8.3.4	Drag Coefficient Estimation for Key Symmetrical Shapes	231
8.3.4.1	Various Drag Contributions	232
8.3.4.2	Shapes 1B and 2B, $R_D = 7.3 \times 10^4$ , L/D = 8	233
8.3.4.3	Skin Friction Calculations	235
8.3.4.4	Streamlined Noses and Negative Nose Drag	235
8.3.4.5	Jet Pump Effect	236
8.3.4.6	Shapes 1A and 2A, $R_D = 7.3 \times 10^4$ , L/D = 20	236
8.3.4.7	Shapes 1B, 2B, 1A, 2A for $R_D = 2.9 \times 10^3$	236
8.3.4.8	Drag for Shapes 3A, 3B	237
8.3.4.9	Drag for Shapes 4A, 4B	238
8.3.4.10	Drag for Shapes 5A, 5B	238
8.3.4.11	Drag for Shapes 6A, 6B	239
8.3.5	Estimation of Drag Coefficients for Unsymmetrical Shapes	240
8.3.6	Application of Derived Drag Coefficients to Car Body Design	243
<b>8.4</b>	<b>EXPERIMENTAL DETERMINATION OF DRAG COEFFICIENTS</b>	249
8.4.1	Introduction	249
8.4.2	Wind Tunnel Types	249
8.4.3	Wind Tunnel Construction and Operation	251
8.4.4	Wind Tunnel Velocity Calibration	255
8.4.5	Standard Test Objects	258
8.4.6	Car Body Drag Coefficient Measurement	259
<b>8.5</b>	<b>SUMMARY OF BODY AND WHEEL DRAG COEFFICIENTS</b>	266

## TABLE OF CONTENTS (CONTINUED)

### CHAPTER 9 - FRICTION AND LUBRICATION

<b>9.1</b>	<b>INTRODUCTION</b>	.....	267
<b>9.2</b>	<b>THE NATURE OF FRICTION</b>	.....	267
<b>9.3</b>	<b>CHARACTERISTICS OF LUBRICANTS</b>	.....	273
9.3.1	Liquid Lubrication - Hydrodynamic	.....	273
9.3.2	Liquid Lubrication - Boundary	.....	277
9.3.3	Dry Solid Lubricants	.....	280
<b>9.4</b>	<b>LUBRICANT SCREENING TESTS</b>	.....	285
9.4.1	General Experimental Setup	.....	285
9.4.1.1	The Total Spin Time (TST) Method	.....	286
9.4.1.2	The Spin Time Decay (STD) Method	.....	286
9.4.2	Cylindrical Tins	.....	287
9.4.2.1	The Small Tin	.....	289
9.4.2.2	The Large Tin	.....	292
9.4.3	Thin Discs	.....	293
9.4.3.1	Thin Steel Disc - Top Spun	.....	293
9.4.3.2	The Navier-Stokes Solution	.....	294
9.4.3.3	The T2 Trimmed Wheel	.....	295
9.4.4	Liquid Lubricant Friction Tests	.....	296
9.4.4.1	Wheel Bore and Axle Preparation	.....	296
9.4.4.2	Fitting FDS	.....	296
9.4.4.3	Liquid Lubricant Preparation	.....	299
9.4.4.4	Experimental Procedure	.....	301
9.4.4.5	Liquid Lubricant Friction Results	.....	303
9.4.5	Solid Lubricant Friction Tests - Low Velocity Average Coefficient of Friction	.....	305
9.4.5.1	Wheel Bore and Axle Preparation	.....	305
9.4.5.2	Lubrication Procedures	.....	306
9.4.5.3	Solid Lubricant Screening Results	.....	308
9.4.5.4	X-Lube Graphite Lubricant Results	.....	313
9.4.5.5	PTFE Powder Results	.....	315
9.4.5.6	Molybdenum Disulfide Powder Results	.....	316
9.4.5.7	Effect of Axle Roughness	.....	316
9.4.6	Solid Lubricant Friction Tests - Coefficient of Friction as Function of Velocity	.....	317
9.4.6.1	Discussion of Results	.....	317
9.4.6.2	Average Coefficient of Friction by TST	.....	319
9.4.6.3	Variable Friction Effect on Race Time	.....	319
9.4.6.4	Brass Bore on Steel X-lubed Axle	.....	322
<b>9.5</b>	<b>COEFFICIENT OF FRICTION FOR TRANSVERSE WHEEL SLIDING</b>	.....	323

### CHAPTER 10 - THE PERFECT RACE

<b>10.1</b>	<b>INTRODUCTION</b>	.....	325
<b>10.2</b>	<b>CENTER OF MASS VERSUS AIR RESISTANCE OPTIMIZATION</b>	.....	325
<b>10.3</b>	<b>WHEEL RADIUS VERSUS MOMENT OF INERTIA OPTIMIZATION</b>	.....	330
<b>10.4</b>	<b>PERFORMANCE OF RACE600Z.BAS</b>	.....	335
<b>10.5</b>	<b>SENSITIVITY OF TIME TO NET MASS OF RACE CAR</b>	.....	336
<b>10.6</b>	<b>BALL BEARING RUNS</b>	.....	337
<b>10.7</b>	<b>ACTUAL PERFECT RACE ANALYSES FOR VARIOUS CARS</b>	.....	339

## TABLE OF CONTENTS (CONTINUED)

### CHAPTER 11 - STATISTICS AND RACE VARIABILITY

<b>11.1</b>	<b>INTRODUCTION TO STATISTICS</b>	345
<b>11.2</b>	<b>CHAPTER OUTLINE, INCLUDING APPENDICES 14 -18</b>	345
<b>11.3</b>	<b>STATISTICAL DEFINITIONS</b>	346
<b>11.4</b>	<b>TIME MEASUREMENTS IN DATA SET 1</b>	348
11.4.1	Data acquisition for Data Set 1	348
11.4.2	Graphical Depiction of Data Set 1	350
11.4.3	The Distribution of the Mean Values	351
11.4.4	The Distribution of the Deviations from Time Heat Mean Values	325
11.4.5	The $z$ Variable	353
11.4.6	Goodness-of-Fit for Normal Distributions of Data Set 1	353
11.4.6.1	Data Set 1- Goodness-of-Fit	354
11.4.6.2	Time Heat and Randomly Selected 3-Time Averages - Goodness-of-Fit	355
11.4.6.3	Time Heat Deviates - Goodness of Fit	356
11.4.7	Other Applications of the $\chi^2$ Distribution	356
11.4.7.1	The $\chi^2$ Distribution for $df = 1$	356
11.4.7.2	Testing $\chi^2$ , $df = 1$	357
11.4.7.3	The $\chi^2$ Distribution for $df = 2$ and $df = 3$	359
11.4.8	The Standard Deviation Distribution	360
<b>11.5</b>	<b>APPLICATIONS TO DATA SET 2</b>	361
<b>11.6</b>	<b>APPLICATIONS TO DATA SETS 3 AND 4</b>	362
<b>11.7</b>	<b>ESTIMATION APPLICATIONS USING NORMAL AND T -DISTRIBUTIONS</b>	364
11.7.1	Given $\sigma$ , $\mu$ and a Normal Distribution	364
11.7.2	Given $\sigma$ , $x$ and a Normal Distribution	365
11.7.3	The Difference Between Time Heat Averages	366
11.7.4	Given $s$ , $\bar{x}_{..}$ , and a Normal Distribution	369
<b>11.8</b>	<b>CORRELATION USING LINEAR REGRESSION</b>	370
11.8.1	Simple Linear Regression - Derivation	370
11.8.2	Simple Linear Regression - Correlation Coefficient	372
11.8.3	A Statistical Model for Linear Regression	374
11.8.4	Multiple Linear Regression - Introduction	377
11.8.5	Multiple Linear Regression - Derivation	377
<b>11.9</b>	<b>LINEAR REGRESSION APPLICABILITY</b>	382

### CHAPTER 12 - OTHER CAR DESIGNS

<b>12.1</b>	<b>FUNNY CARS</b>	383
12.1.1	The Falling Weight Car	383
12.1.2	The Rocket Powered Car	385
12.1.2.1	Car Parts	385
12.1.2.2	Car Construction	385
12.1.2.3	Wiring the Circuit	389
12.1.2.4	Operation	389
12.1.2.5	Performance	390
<b>12.2</b>	<b>THE NEARLY PERFECT CAR</b>	392
12.2.1	Introduction	392
12.2.2	Body Design	392
12.2.3	Wheel Design	395
12.2.4	Air Drag	396
12.2.5	Body Assembly and CM Calculations	396
12.2.6	Performance of the NP Car	397

## TABLE OF CONTENTS (CONTINUED)

### APPENDIX 1 - PHOTOGRAPHS

<b>Photo A1.P1</b>	Cars JNGE, JNSN, and T2 at the gate .....	399
<b>Photo A1.P2</b>	The Standard Car as described in <b>Chapter 1</b> and in <b>Fig 8.3</b> .....	399
<b>Photo A1.P3</b>	Views of the BW Pace Car and the JSRG Car described in <b>Chapter 8</b> .....	400
<b>Photo A1.P4</b>	Views of the JNRG Car and the JNTS Car as described in <b>Chapter 8</b> .....	401
<b>Photo A1.P5</b>	Views of the JNSN Car and the JSTR Car as described in <b>Chapter 8</b> .....	402
<b>Photo A1.P6</b>	Views of the T2 Car and the JNGE Car as described in <b>Chapter 8</b> .....	403
<b>Photo A1.P7</b>	Photos of the first 12 wheels from <b>Table 7.10</b> .....	404
<b>Photo A1.P8</b>	Photos of the last 12 wheels from <b>Table 7.10</b> .....	405
<b>Photo A1.P9</b>	Body hole drill guide .....	406
<b>Photo A1.P10</b>	Body lead mold as shown in <b>Figure 8.52</b> .....	406
<b>Photo A1.P11</b>	Compression mold for forming T2 type wheel .....	406
<b>Photo A1.P12</b>	Various aluminum and brass fittings used in wheel modification .....	406
<b>Photo A1.P13</b>	Fitting FDS as shown in <b>Figure 9.38</b> .....	406
<b>Photo A1.P14</b>	An old Craftsman 4-in lathe used in this work .....	406
<b>Photo A1.P15</b>	Brass tubing 0.0625" OD by 0.036" ID .....	407
<b>Photo A1.P16</b>	Brass tubing shown in <b>A1.P15</b> crimped towards the end .....	407
<b>Photo A1.P17</b>	Lathe tools as shown in <b>Figure 7.7</b> .....	407
<b>Photo A1.P18</b>	The T2 Calibrate wheel .....	407
<b>Photo A1.P19</b>	Parts for the JS 039 axle nail according to <b>Figures 7.36</b> through <b>7.39</b> .....	407
<b>Photo A1.P20</b>	The complete JS 039 wheel and axle assembly according to <b>Figure 7.56</b> ..	407
<b>Photo A1.P21</b>	The graphite samples studied in <b>Appendix 11</b> .....	408
<b>Photo A1.P22</b>	A 30 power magnified view of X-lube next to the fine sample G5 .....	408
<b>Photo A1.P23</b>	A sample of X-lube spread out in a plastic dish .....	408
<b>Photo A1.P24</b>	A neodymium iron boron (NIB) magnet placed beneath the sample .....	408
<b>Photo A1.P25</b>	A 30X magnified view of a sparse sample of X- lube spread out .....	408
<b>Photo A1.P26</b>	The magnetic field from a NIB magnet causes the individual .....	408

### APPENDIX 2 - TRACK CONSTRUCTION

<b>A2.1 INTRODUCTION</b> .....	409
<b>A2.2 MATERIALS</b> .....	409
<b>A2.3 PLYWOOD AND GUIDE STRIP PREPARATION</b> .....	410
A2.3.1    Cutting the Pieces .....	410
A2.3.2    Sanding and Varnishing .....	410
A2.3.3    Assembly of the Plywood Track Sections .....	412
<b>A2.4 SECTION 1 CONSTRUCTION AND ASSEMBLY</b> .....	414
A2.4.1    Leg Assembly and Attachment .....	414
A2.4.2    The Starting Bar .....	417
A2.4.3    The Trigger Assembly .....	418
A2.4.4    Guide Strip Attachment and Track Setup .....	418

### APPENDIX 3 - THE BRUSH STOPPER .....

..... 420

## TABLE OF CONTENTS (CONTINUED)

### APPENDIX 4 - SIMPLE HIGH PERFORMANCE CARS

<b>A4.1</b>	<b>THE STANDARD CAR</b>	422
<b>A4.2</b>	<b>PREPARING THE AXLE</b>	423
<b>A4.3</b>	<b>LUBRICATION</b>	424
<b>A4.4</b>	<b>PERFORMANCE IMPROVEMENTS</b>	426
A4.4.1	Modification B - Use 3 Wheels Rather than 4	426
A4.4.2	A Simple but Fast Cub Scout Car	427
A4.4.2.1	General Construction	427
A4.4.2.2	Modification C - Streamline Body	429
A4.4.2.3	Modification D - Moving Weight to Rear	429
A4.4.2.4	Modification E - Trim Wheels to Minimum Allowed	429
A4.4.2.5	Modification F - Change to X-Lube Graphite	429
A4.4.2.6	Modification G - Change to a Low Profile Car	430
A4.4.2.7	Modification H - Move More Weight to the Rear	431
A4.4.3	Modification I - Shave Wheel as a Semi-Pro Modification	431
<b>A4.5</b>	<b>A BODY DRILL GUIDE ASSEMBLY</b>	432
<b>A4.6</b>	<b>A SIMPLE INEXPENSIVE BALANCE</b>	433

### APPENDIX 5 - MILNES.BAS

### APPENDIX 6 - RACE600Z.BAS

### APPENDIX 7 - RACE600Z.BAS APPLIED TO PERFECT RACE DATA- FIG. 10.21

445

### APPENDIX 8 - AXLE/WHEEL FRICTION FORCES

<b>A8.1</b>	<b>NEWTON'S SECOND LAW APPROACH - SMALL CLEARANCE</b>	446
<b>A8.2</b>	<b>WORK-ENERGY APPROACH - LARGE CLEARANCE</b>	448

### APPENDIX 9 - AIR DRAG FOR PROJECTED AREA ASPECT CHANGES

449

### APPENDIX 10 - AIR RESISTANCE OF ROTATING DISC ABOVE A PLANE

452

### APPENDIX 11 - MAGNETIC PROPERTIES OF GRAPHITES

<b>A11.1</b>	<b>INTRODUCTION</b>	453
<b>A11.2</b>	<b>EXPERIMENTAL PROCEDURE</b>	454
<b>A11.3</b>	<b>DATA ACQUISITION</b>	454
<b>A11.4</b>	<b>MOLAR CONCENTRATION OF ADSORBED OXYGEN</b>	455
<b>A11.5</b>	<b>DISCUSSION OF RESULTS</b>	456
<b>A11.6</b>	<b>RELATED AND FUTURE WORK</b>	457

### APPENDIX 12 - 1991 & 1999 STANDARD WHEELS

458

### APPENDIX 13 - AIR RESISTANCE OF A ROLLING SPHERE

<b>A13.1</b>	<b>INTRODUCTION</b>	460
<b>A13.2</b>	<b>EXPERIMENTAL SETUP</b>	460
<b>A13.3</b>	<b>EXPERIMENTAL RESULTS</b>	461
<b>A13.4</b>	<b>DISCUSSION OF RESULTS</b>	463

### APPENDIX 14 - THE CHI-SQUARED DISTRIBUTION

<b>A14.1</b>	<b>INTRODUCTION</b>	464
<b>A14.2</b>	<b>THE ISOTHERMAL ATMOSPHERE</b>	464
<b>A14.3</b>	<b>TWO DEGREES OF FREEDOM</b>	466

## TABLE OF CONTENTS (CONTINUED)

A14.4	THREE DEGREES OF FREEDOM .....	467
A14.5	THE GAMMA FUNCTION .....	468
<b>APPENDIX 15 - NORMAL PARAMETERS AND THE STUDENT-T DISTRIBUTION</b>		
A15.1	INTRODUCTION .....	469
A15.2	AVERAGE OF A NORMAL RANDOM VARIABLE .....	469
A15.3	VARIANCE OF A NORMAL RANDOM VARIABLE .....	470
A15.4	DISTRIBUTION OF THE SAMPLE VARIANCE .....	470
A15.5	THE SAMPLE VARIANCE AVERAGE VALUE .....	473
A15.6	THE STUDENT - <i>T</i> DISTRIBUTION .....	474
<b>APPENDIX 16 - DISCRETE RANDOM VARIABLES &amp; THE GOODNESS-OF-FIT TEST</b>		
A16.1	INTRODUCTION .....	479
A16.2	DISCRETE PROBABILITY DISTRIBUTIONS .....	479
A16.3	THE NATURE OF RANDOM VARIABLES .....	480
A16.4	COMBINATIONS OF TWO RANDOM VARIABLES .....	480
A16.5	BERNOULLI TRIAL .....	481
A16.6	BINOMIAL RANDOM VARIABLES .....	481
A16.7	MULTINOMIAL RANDOM VARIABLES .....	484
A16.8	THE GOODNESS-OF-FIT TEST - NO PARAMETERS .....	485
A16.9	GOODNESS-OF-FIT - NORMAL DISTRIBUTION APPLICATION .....	486
<b>APPENDIX 17 - SAMPLING AND THE CENTRAL LIMIT THEOREM</b>		
A17.1	INTRODUCTION .....	488
A17.2	RANDOM SAMPLES AND POPULATIONS .....	488
A17.3	THE LAW OF LARGE NUMBERS .....	488
A17.4	THE CENTRAL LIMIT THEOREM .....	489
A17.5	AN EMPIRICAL COIN TOSS EXPERIMENT .....	490
A17.6	AN EXPERIMENT WITH A SIMULATED NORMAL DISTRIBUTION .....	492
A17.7	RELATION BETWEEN VARIANCES OF POPULATIONS, AVERAGES, DEVIATES ..	494
<b>APPENDIX 18 - 405 TIMES IN 135 TIME HEATS .....</b> 496		
<b>APPENDIX 19 - APPLICATION NOTES</b>		
A19.1	VARIABLE AIR DRAG COEFFICIENTS .....	498
A19.1.1	The Euler numerical method .....	498
A19.1.2	Application to Falling Objects .....	499
A19.1.3	Application to a Race Car .....	501
A19.2	THE BALLISTIC PENDULUM .....	503
